Nordic Sugar A/S (NordZucker). One of Europe's leading sugar manufacturers, Nordic Sugar A/S has among others a plant in Nakskov, Denmark. Since the setting of the plant back in 1882, the city of Nakskov evolved greatly and has expanded over the years in the immediate vicinity of the plant. This development means that The nearest private residences are located quite close to the factory. The location means that Nordic Sugar A/S, over the last many years, has invested in a wide range of environmental improvement measures. In order to reduce odors, Nordic Sugar A/S in 2008 decided to cover an approx. 2000 m<sup>2</sup> pool containing detergent / rinse water. Mr. Ture Kliving, Environment Responsible, Nordic Sugar says in regard of the Hexa-Cover® Floating Cover: "We chose Hexa-Cover® Floating Cover for covering our pool for several reasons. First of all the Hexa-Cover® Floating Cover ensure an effective reduction of odors but also because the solution is simple and straightforward. The Hexa---Cover® Floating Cover is poured in, and automatically they create a coherent cover and automatically adapt to changes in the water level. The lifetime of 25 years was another factor. We are pleased with the choice of Hexa-Cover Floating Cover concludes Ture Kliving."
